Liquid Dispense

BEVERAGE EQUIPMENT MANUFACTURER

Liquid Dispense is a full fabrication & manufacturing company that offers everything you need from the cold room to the bar. We supply installers, beer wholesalers, craft breweries, bars & restaurants & food equipment suppliers with quality products that meet their dispensing needs.

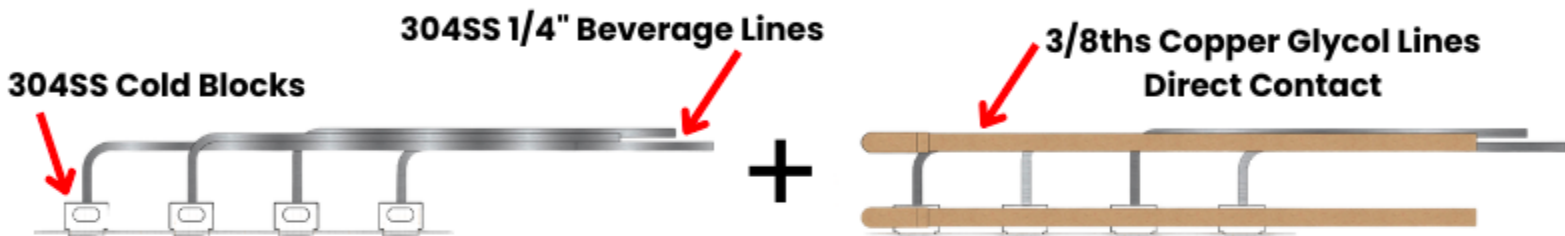

We invest in research and development to drive innovation and to stay ahead of the competition. Our commitment to developing new products, improving existing ones is what keeps us at the forefront of industry.

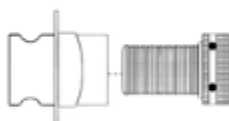

Tower Technology

PATENT PENDING COLD BLOCK SUPERCHILL COOLING SYSTEM

The Liquid Dispense patent pending **"SUPERCHILL"** cold block technology keeps our dispensing tower beverage lines and components at a consistently low temperature. By maintaining the right temperature foaming is drastically reduced and preserving quality and taste.

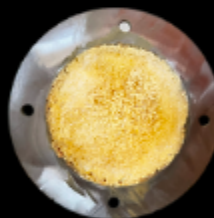

304SS beverage lines are directly welded to our patent pending 304SS cold blocks. The copper glycol lines are directly attached to the cold block which makes sure every beverage line is cooled. The beverage remains at the optimal serving temperature, preserving its quality and taste. Once the cold block system is complete they are fully insulated & sealed. This complete one piece structure doesn't allow the cold blocks to rotate or move.

We only use 304SS shanks which are removable in both glycol and air cooled towers.

FULLY FOAMED SWEAT FREE

Our glycol dispensing towers are fully foamed which maintains the beverage at a chilled and consistent temperature. This stops the tower from sweating.

304 STAINLESS STEEL

Liquid Dispense dispensing towers come with 1/4" 304SS beverage lines and 304SS faucets.

You can dispense beer, wine, water, cocktails, cold brew and nitro coffee from any tower.

Every Liquid Dispense tower comes with our 5 Year Warranty giving you peace of mind.

NEW

Circulus Series

Sometimes you just need to think outside the box

We took one of the oldest designs in the industry and added some curves giving it a new sleeker updated look.

Nitro Infusion

Imagine some of your favorite beverages being infused with Nitrogen.

Instead of Co₂, which is used for beer, you add Nitrogen to give your beverage a new sensation and taste. N₂ gives your drink a silky head letting it slide down your throat.

Nitro Infused Systems from Liquid Dispense are served straight from the tap making sure your customer gets a fresh drink every time!

NITRO  INFUSER

Nitro Beverage Inspiration

Nitro Infusion opens up many profit possibilities. Check out some of these ideas to help inspire your Nitro drink menu.

NITRO  INFUSER

Nitro Coffee

Nitro Cold Brew

Nitro Latte

Nitro Kombucha

Nitro Strawberry

Nitro Pineapple

On Demand Infusion

The *Nitro Infuser* quickly installs between keg and tap. Using the latest Nitrogen Control System (NCS), this device empowers your existing keg system. They're small & compact.

NITRO  **INFUSER**

Nitro Infuser AGM Single

Multi Vortex Mixing Chambers - facilitates proper infusion of beverages

Nitrogen Control System (NCS) - superior control over nitrogen infusion

Thermal Retention Media - maintains consistent beverage temperature

Installs in any kegerator or draft system

Nitro Infuse beverages including: Tea, Wine, Chai Tea Latte, Energy Drink, and much more

Use with both long draw system and kegerator installs

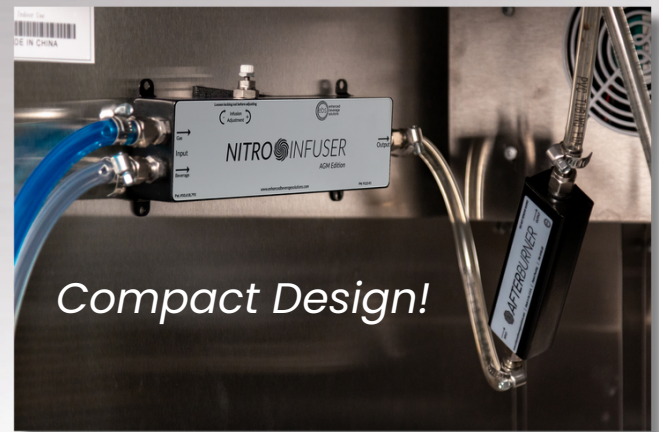

Nitro Infuser AGM Dual

Nitro Infuser AGM Triple

The **Afterburner** sends your beverage through an additional round of our patented Dual Vortex Mixing Chambers right before it leaves the tap, so you can easily achieve the perfect Nitro Cold Brew.

AFTERBURNER

The Industries Best Nitro Infusion

NEW

Nitro Infuser POD

NITRO INFUSER

Nitro Infuser POD sets the industry standard for nitro infusing any beverage in a long draw draft system. Designed to install at the **"Point of Dispense"** this is perfect for any high volume establishment with demanding peak dispensing requirements.

The Nitrogen Control System assures proper infusion glass after glass. Amaze your customers and nitro infuse most any beverage including cold brew coffee, tea, kombucha, energy drinks, cocktails, beer and more.

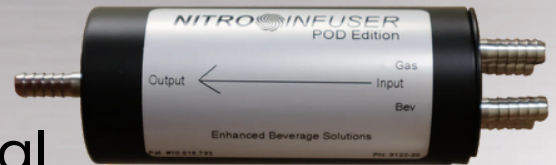

LDEBSPOD-1

Nitro Infuser POD - Single

LDEBSPOD-2

Ask Us About Complete Nitro Dispensing Systems

NitroBIB - Ready To Dispense

Say Goodbye to Convenience Store Solutions, You Can Now Dispense Specialty Still And Nitro Infused Bag-In-Box (BIB) Beverages From A Kegeerator

Dispense Bag In Box from any kegerator

Simultaneously dispenses to still and nitro infused faucets

Supports most BIB formats (BIB to nitro BIB hose required)

No electricity required

Nitro infusion technology built in

Length: 11.5", Width: 11.25", Height: 8", Weight: 13.2 lbs

Nitrogen Control System (NCS) - Adjustable nitrogen infusion level

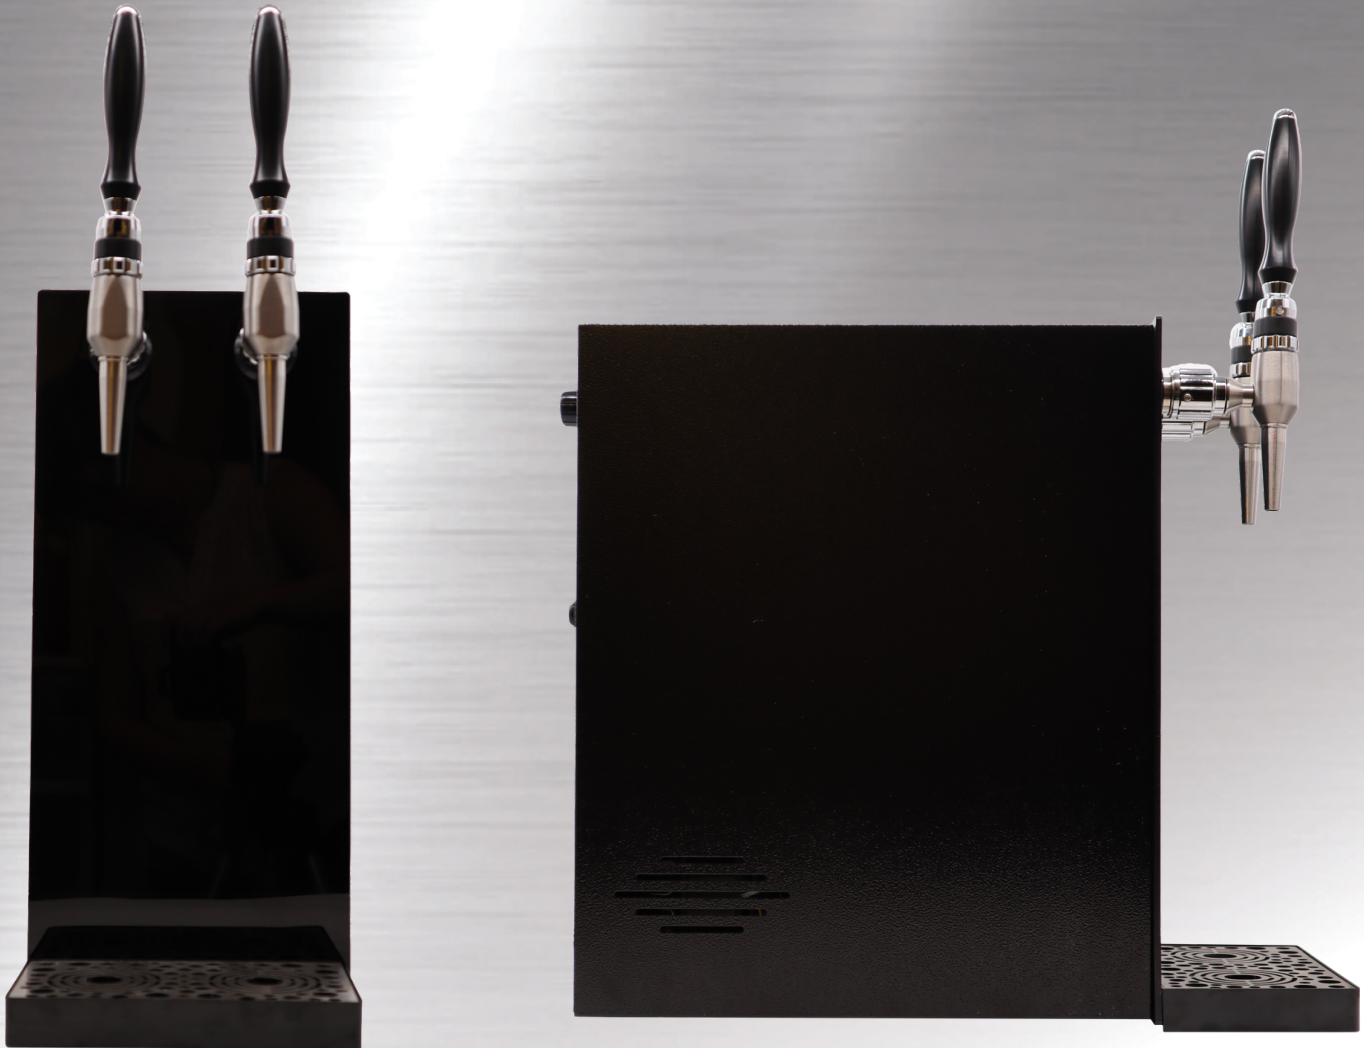

Industrial-Grade Design - Steel Enclosure - Draft Industry fittings

Conforms to NSF standards

Countertop Nitro Fusion

The perfect addition to your café, bar or restaurant. The Nitro Fusion countertop dispenser allows you to expand your menu with exciting nitrogen infused drinks. Serve that Instagram drink your customer is searching for!

- Easy & hassle-free installation
- Compatible with Keg & Bag in Box
- Atmosphere Nitrogen Generator eliminates need for external Nitrogen gas source
- Auto shut off when BIB or Keg is empty
- Integrated cooler - Eco-friendly R290 refrigerant
- Elegant/compact design : 7"W x 14"D x 16"T
- Nitro infusion provides sweetness, and creamy texture without adding calories

Chilled Still & Sparkling Water™

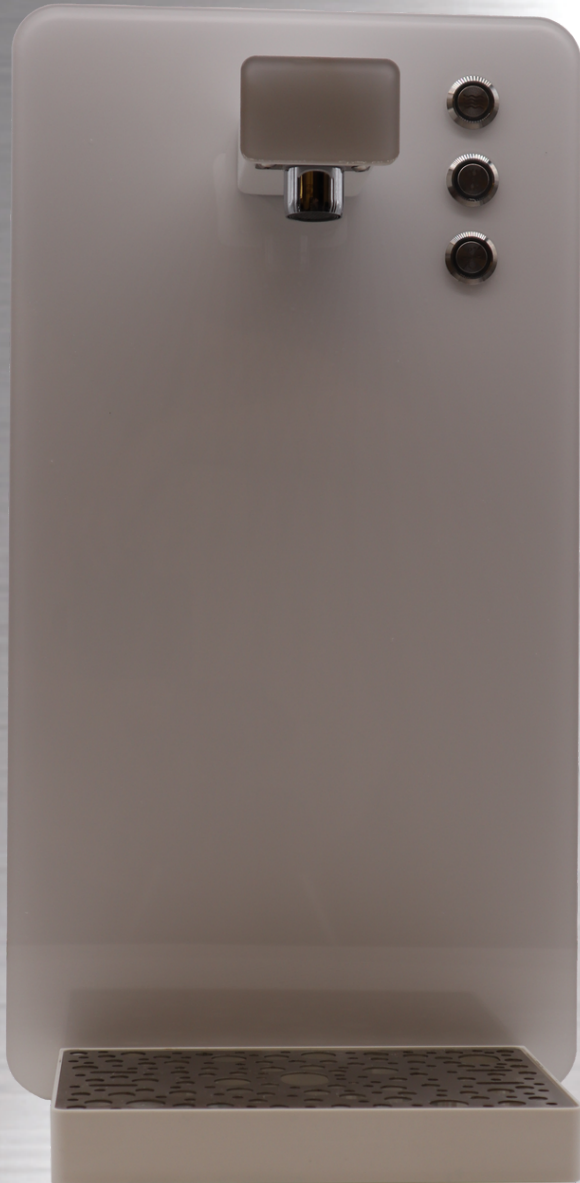

Turn tap water into profits

Sparkling water on tap allows for a broader range of beverage choices. It can be consumed plain, mixed with various flavorings, or used as a base for cocktails, providing versatility in your drink options.

Sparkling water is a healthier alternative to sugary sodas and other high-calorie beverages. It provides the fizzy sensation and refreshment without the added sugars, artificial flavors, or preservatives commonly found in sodas.

Countertop Draft Carbonator

Specifications

- 30 l/h chilling-dispensing rate
- Dispense Still, Chilled Still and Sparkling water
- 304 stainless steel design
- Weighs only 44.1 lbs
- Use standard 6oL CO2 bottle

Turn water into Profits™

- In Line On Demand carbonation technology
- Impressive carbonation levels & beverage gas retention
- Countertop or Under Counter units
- Quickfit™ connections for easy install
- Compact energy-efficient design

Small countertop footprint measures: 7.5" x 17.7" x 17.3"

Environmentally Friendly

- Eliminates plastic bottles
- Minimum energy usages thanks to Draft Cool™ Compressor Cooling Technology
- Eco-friendly R290 refrigerant
